

Eco-Schools

Linking Eco-Schools to the Primary National Curriculum

The table below shows how primary schools delivering the National Curriculum are already delivering environmental education with very clear links to Eco-Schools topics.

This table demonstrates how schools can link their classroom work with Eco-Schools topics. This will help ensure that environmental education is embedded throughout the school. It will also help schools to create links between Eco-Schools topics and the work they need to deliver, enabling pupils to learn the National Curriculum through real world examples.

Key Stage	Subject	Topic	Eco-Schools
1	Science	Plants	School grounds, Biodiversity
		Animals, including humans	Biodiversity, Healthy living
		Everyday materials	Waste
		Living things and their habitats	Biodiversity
	Art	Use a range of materials creatively	Waste
	Design and Technology	Cooking and nutrition	School grounds, Biodiversity, Global perspective
	Geography	Place knowledge	Global perspective
		Geographical skills and fieldwork	School grounds
PE		Healthy living	
2	Science	Plants	School grounds, Biodiversity
		Animals, including humans	Healthy living
		Living things and their habitats	Biodiversity, Litter, Global perspective
		States of matter	Water
		Electricity	Energy
	Design and Technology	Cooking and nutrition	School grounds, Biodiversity, Global perspective
	Geography	Human and physical geography	Water, Energy, Waste
	PE		Healthy living
